Logistic Regression

→ Used For Classification and Decision-Making

→ Mainly used when outcome is Binary meaning it have 2 option.

Logistic Regression	Regression
Measure Probabilities	Continuous

Epoch

⇒ As it measures Probabilities;
So it lies b/w 0 and 1.

• Sigmoid Function (S-Curve):
We can't plot binary data on graph in straight line.
To Solve,
we use Sigmoid in LR Backend

1/1
